

A clear plan for your commodity.

CAPABILITY STATEMENT

Tau Export is developing a commodity packing facility in City Deep. We help scope the product, packing and dispatch requirements so that each proposed job starts with a clear handling plan.

FACILITY STATUS

Under development. Service availability, start dates, capacity and any required approvals must be confirmed directly before a booking is accepted.

01 Bulk mineral container packing

Planned transfer of suitable loose mineral cargo into lined export containers, with the loading specification and payload agreed per shipment.

02 Bulk bags and commodity bagging

Planned bulk-bag (FIBC) and sack options. Material suitability, bag specification, lifting, labelling and liner requirements are assessed individually.

03 Container preparation and export coordination

Scope the records and handover needed for dispatch, including weighing, lot and seal records, photographs and packing lists as agreed.

A defined scope for every job

Transport, forwarding, customs and carrier responsibilities sit with the appointed providers unless separately agreed. Product acceptance, licences, timelines and documentation are confirmed for the specific enquiry.

COMMODITY PACKING & EXPORT

City Deep, Johannesburg | South Africa

Start with what you know.

We can discuss the remaining details with you. An enquiry is the start of the assessment, not a confirmed quotation or capacity reservation.

What to include in your enquiry

- 01 The product** - Commodity, grade, moisture and bulk density if known. Include any special handling requirements.
- 02 The volume** - Approximate tonnes, shipment frequency and the packing format you need.
- 03 The route** - Collection point, intended port or destination, and your appointed transport or forwarding contacts.
- 04 The specification** - Liners, bag sizes, labels, weighing, seal records, photographs and buyer requirements.
- 05 The timing** - Required packing or dispatch dates and any terminal cut-offs you already know.
